👤 Profile

Detail-oriented B.Tech student specializing in Machine Learning, Generative AI, and cloud-based application development. Strong proficiency in Python, data analysis, and building scalable REST APIs using AWS services. Hands-on experience with large language models, data preprocessing, and model evaluation.

📁 Experience

REGex Software Services 06/2025 – 08/2025 | Jaipur, Rajasthan (Hybrid)
Summer Intern – Generative AI and Machine Learning

- Optimized prompts and analyzed large language model behavior across multiple test scenarios to improve response quality.
- Developed Python-based machine learning pipelines for data preprocessing, feature engineering, training, and evaluation, reducing manual effort by approximately 40%.
- Evaluated multiple machine learning models using accuracy and validation metrics to support automation tasks.

🎓 Education

BK Birla Institute of Engineering & Technology 2023 – 2027 | Pilani, Rajasthan
Bachelor of Technology (Artificial Intelligence)
Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Operating Systems, Machine Learning

🧠 Skills

Technical: Python, C, C++, Java, JavaScript, SQL, Data Structures and Algorithms, Object-Oriented Programming, DBMS, Machine Learning, Generative AI

Tools & Platforms: AWS (Lambda, API Gateway, Amazon S3, Amazon Bedrock), Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Git, GitHub, VS Code, Jupyter Notebook, Google Colab

📜 Certifications

- Python for Data Science
- TCS-ion career Edge-young professional
- Machine Learning Fundamentals
- C++ and SQL Programming

📁 Projects

Serverless AI Text Generation Pipeline 2025

- Designed and deployed a serverless REST API using AWS Lambda and API Gateway, handling 500+ AI text generation requests per day.
- Integrated Amazon Bedrock large language models and securely stored more than 1,000 generated responses in Amazon S3.

IPL Data Analysis (2008–2020) 2025

- Analyzed 10,000+ IPL match records using Python to identify team, season, and venue performance trends.
- Created 15+ visualizations to uncover insights related to run distribution and match outcomes.

AI Chatbot using Python and Streamlit 2025

- Built and deployed a lightweight AI chatbot using Python and Streamlit enabling real-time interaction through a simple web interface.
